## Water Use Efficiency Annual Performance Report - 2011

WS Name: WHITE SALMON, CITY OF

Water System ID# : 96350                      WS County: KLUCKITAT

Report submitted by: *Tommy Smith*

### Meter Installation Information:

Estimate the percentage of metered connections: 100%

If not 100% metered – Did you submit a meter installation plan to DOH? No

Within your meter installation plan, what date did you commit to completing meter installation?

Current status of meter installation:

### Production, Authorized Consumption, and Distribution System Leakage Information:

12-Month WUE Reporting Period 01/01/2011 To 12/31/2011

Incomplete or missing data for the year? No

If yes, explain:

<b>Total Water Produced &amp; Purchased (TP)</b> – Annual volume gallons	304,344,050 gallons
<b>Authorized Consumption (AC)</b> – Annual Volume in gallons	205,747,000 gallons
Distribution System Leakage – Annual Volume TP – AC	98,597,050 gallons
Distribution System Leakage – DSL = [(TP – AC) / TP] x 100 %	32.4 %
3-year annual average - %	29.1 %                      2009, 2010, 2011

### Goal-Setting Information:

Enter the date of most recent public forum to establish WUE goal: 07/01/2010

Has goal been changed since last performance report? No

*Note: Customer goal must be re-established every 6 years through a public process.*

### Customer WUE Goal (Demand Side):

*To reduce outside water use and reduce leakage (toilets, Faucets, irrigation lines) Reduce leakage within the city system. Reduce water consumption by 10 percent over the next 20 year period.*

### Customer (Demand Side) Goal Progress:

Handouts sent to all customers with the water bills on water conservation. Reduced amount of large irrigation systems in the city water system. Educated customers on different types of irrigation systems.

### Additional Information Regarding Supply and Demand Side WUE Efforts

*Replace 14" steel H2O line on Loop Road with a new 12" PVC line to reduce multiple leakage and line degradation. Installed 16" main line 12,000 feet to replace a old line that was unmaintainable.*

### Describe Progress in Reaching Goals:

- Estimate how much water you saved.
- Report progress toward meeting goals within your established timeframe.
- Identify any WUE measures you are currently implementing.
- If you established a goal to maintain a historic level (such as maintaining daily consumption at 65 gallons per person per day for the next two years) you must explain why you are unable to reduce water use below that level.

The following questions will help DOH better understand water usage, water resources management and drought response. The data will be used to provide technical assistance, not for regulatory purposes.

### All questions are voluntary

Month	Date of Measurement	Static Water Level (feet below measuring point)	Dynamic Water Level (feet below measuring point)
January			
February			
March			
April			
May			
June			
July			
August			
September			
October			
November			
December			

**Water level data:**

Please provide the following information (if known) to help us better utilize the water level data.

Well tag Id number:

Well depth:

Water level accuracy (within 0.01 ft < 1 ft ~ 1 ft)

Completion type (e.g., cased open interval, cased open-ended, cased open-ended with perforations, etc...)

Location coordinates (latitude, longitude) and accuracy of the coordinates (< 1ft, ~1ft, >1000ft)

Water level parameter name (e.g. depth below measuring point, depth below top of casing, depth below ground surface)

Elevation of top of casing OR elevation of measuring point if different than top of casing (as specified in question 7)

**Monthly/Seasonal Water Usage:**

What was your maximum daily water demand for the previous year (in gallons per day)? \_\_\_\_\_

Month	Volume of Water Produced in gallons
January	
February	
March	
April	
May	
June	
July	
August	
September	
October	
November	
December	

**Water shortage response:**

Did you activate any level of water shortage response plan the previous year?

- Yes       No       There was no need to

If you activated a water shortage response plan the previous year, what level did you activate? (Check all that apply)

- Advisory Conservation       Voluntary Conservation  
 Mandatory Conservation       Rationing       Other

What factors caused your water shortage the previous year?

- Drought       Fire       Landslides       Earthquakes  
 Flooding       Water Supply Limitations       Other

**Do not mail, fax, or email this report to DOH**
