

City of White Salmon Office of City Hall

Press Release

Jewett Water Main Improvements Project Moving to Core Downtown Area

Beginning the week of March 2, the city's contractor will be moving to the core downtown area and working between Estes and Main.

The east bound lane (downhill lane) will be closed, including parking, with marked detours in place. The west bound lane (uphill lane) will be open to one lane of travel in the west bound direction with parking available on the north side. Public parking lots have been marked and are available west of City Hall, both lower and upper parking lots and north of the fire station on Church Street. Once work is completed between Estes and Main, the contractor will be moving work to the area between Main and Garfield.

The contractor has agreed to rearrange the schedule to complete work in the core downtown area before the busy summer season starts. The contractor will need to return to the core downtown area in September for paving purposes.

For more information regarding this project, check the city's webpage or call City Hall at 509-493-1133.
